

High quality and reliable Software Solutions & Services

OpenView provides services for :

- Audit and Consulting,
- Tailored applications to suit customers' needs,
- Information system management development,
- Database management,
- Website/Internet/Intranet development,
- Maintenance.

OpenView mission is to provide high quality and reliable software solutions & services to our clients. We are professional and experienced to help enterprises meeting their business goals by developing custom applications, providing system integrations and maintenance services.

Our team is composed of Chinese and European IT engineers and project managers. We can work in English, French, Chinese, and we are able to directly manage your projects in China.

OpenView assists companies on their projects. Through a systematic analysis, we evaluate the projects restraints and objectives. By emphasizing the hidden aspects of the context, we help the company to avoid traps and ease the job of decision makers.

We propose custom development of standard and web applications - databases development (Oracle, SQL Server, MySQL, Access, etc.) - Windev, VB, Java, Visual studio, HTML, XML, Flash, etc.
